

# 17-4 SS ROUND BAR

**One stop shopping just got better with the addition of 17-4 Stainless Steel round bar in more sizes at Industrial Metal Supply.**

17-4 is a chromium-nickel-copper precipitation hardening stainless steel used for applications requiring high strength and moderate level of corrosion resistance along with hardness, toughness and strength. 17-4 PH Stainless Steel is a very widely used precipitation hardened alloy with a toughness especially suited for industrial applications. This valuable combination of properties allows for high reliability of product will simplifying fabrication.

17-4 Round bar is widely used in the following industries:

- Aerospace
- Chemical & Petrochemical
- Food Processing
- Paper
- Nuclear
- General Metalworking

**NOTE:** Larger sizes available upon request.

Stocked Sizes
1/2" RD x 12'
9/16" RD x 12'
5/8" RD x 12'
3/4" RD x 12'
7/8" RD x 12'
1" RD x 12'
1 1/4" RD x 12'
1 3/8" RD x 12'
1 1/2" RD x 12'
1 5/8" RD x 12'
1 3/4" RD x 12'
1 7/8" RD x 12'
2" RD x 12'
