

# BEARING BRONZE 660

## *Available in Solids and Hollows*

**Bearing Bronze** has excellent load capacity and antifriction qualities that make it a preferred alloy for a wide variety of applications such as machine tools, power transmission equipment, electric motors, automotive equipment, tractors, cranes, hoists, elevators and many types of accessory and special equipment. This bearing bronze alloy has good machining characteristics, resists many chemicals and is recommended for medium speed, medium load applications.
